Summary

I am a software engineer with a passion for creating and improving designs to meet company brand styles and business needs. Prepared to offer 10+ years of development experience to a growing company. Adaptable and driven with a strong work ethic and ability to thrive in team-based or individually motivated settings.

Skills

Front-End Technologies

HTML, CSS, Javascript, Python

Back-End Technologies

SQL, MongoDB (noSQL), Express, Node.js

Frameworks

React, Angular, Django

Projects

[Trivia](#)

Created using JavaScript, CSS, and HTML to establish an amazing game of Halloween trivia.

[Bored App](#)

Developed using react and it was deployed using Heroku. This app is effective at giving ideas to do when the user is bored.

[Orange Blog](#)

This app was establish using react and express. This was accomplished in a group environment, and my role was to establish the routes in our back-end.

Experience

Front-End Engineer, 5NINE Data Solutions – Atlanta, GA

Communicated to back-end engineers to successfully helped establish a full-stack application.

Collaborated with front-end engineers to develop and apply wireframes to front-end projects.

Worked with API's to establish full-stack applications.

Functioned with NodeJS/Express to effectively establish a back-end server for the front-end Client.
